

## **A Clear Solution..... For Better Outcomes Treating Damaged Fungal Nails .....Finally**

### **What Makes It so Effective?**

- RENEWED NAIL's proprietary formula uniquely combines three well established active ingredients that by themselves would not solve the problem.
- Working together they create a powerful solution for treating damaged fungal nails.
- RENEWED NAIL® used weekly, in conjunction with monthly doctor visits for debridement, has been shown to greatly improve fungal treatment outcomes, and reduce total treatment time dramatically.

### **How Does It Work?**

1. As the solution is absorbed into the keratin of the nail, it kills fungus on direct contact as undecylenic acid is being released into the nail, and under the nail over time as the coating biodegrades.
2. The clear coating seals off the nail surface, blocking the absorption of air and water which deprives the fungus from its main source of nutrition.
