

Renewed Nail[®]

Developed by a dermatologist and podiatrist

All rights reserved.

BRUSH-ON APPLICATION Improve, restore & beautify discolored & damaged nails due to injury, extended use of artificial nails & nail products & fungus.

New • Safe • Effective

Before Renewed Nail[®]

Easy to apply from our spill resistant and tamper proof bottle.

After Renewed Nail[®]

CAUTION: Eye irritant. Cyanoacrylate bonds skin & eyes in seconds.
KEEP OUT OF REACH OF CHILDREN.

If swallowed get medical help or contact a poison control center immediately.

WARNINGS For external use only. Review prior to use.

- Avoid contact with eyes.
- Avoid touching fingers together if product gets on hands.
- Do not touch the solution or applicator brush to skin to avoid bonding.
- Allow surfaces to dry thoroughly after application.
- Stop use immediately if any irritation occurs.
- Do not use on children under 2 years of age without doctor's advice.

RENEWED NAIL[®] DIRECTIONS FOR USE

Read Instructions Completely Before Using

* Do not touch the applicator brush to the rim of the bottle as it seals the cap when closed. To prevent the cap from sticking, apply Vaseline[®] to the outside threads of bottle before closing the cap tightly after the first use, then store upright. The solution is sensitive to moisture in the air and can dry out with prolonged exposure. Do not leave the bottle open for long periods of time.

* Users with history of diabetes or vascular problems need to consult a medical professional prior to using this product. Users with history of allergy to Cyanoacrylate, Hydroquinone, or Undecylenic Acid should refrain from using.

* If redness occurs on the skin around nails, discontinue use and consult with your doctor.

Each box contains one bottle (4 g / .14 oz) of Renewed Nail[®] with applicator brush, two flexible toe separators, two nail files for debridement, and one nail brush for cleaning.

STEP 1 PREPARATION / DEBRIDEMENT

Carefully trim away and file the entire surface of the affected nail(s) thoroughly initially and then every 2 to 4 weeks. Professional debridement of the nails is recommended initially and then monthly.

Pre-Debridement

Complete Debridement

STEP 2 APPLICATION

Flexible toe separators

Make sure nails are dry and free of lotion/oil. Place the enclosed flexible toe separators between the toes, and apply a layer of solution to the nails. Let dry for 3 to 5 minutes then reapply a second coat of the solution to be sure the nail surface and the edges of the skin are covered.

Note: Nail polish may be applied directly over the dried coat of Renewed Nail[®].

Post-Application

STEP 3 REPEAT APPLICATION EVERY TWO DAYS

Nail polish must be removed completely. Make sure nails are dry and free of lotion/oil. Loose flaky nails and dried out Renewed Nail[®] solution around the edges needs to be removed. File smoothly and dust off the nail surface with the enclosed nail file and nail brush to allow the new layers of solution to absorb well around and under the nails. Apply two coats of solution as explained above.

VISIBLE COSMETIC IMPROVEMENT IN ONE DAY!

Untouched photos taken the SAME office visit!!!

AMAZING!

Pre-Debridement

Complete Debridement

Post-Application

Renewed Nail[®]

A TOPICAL OPTION WITH ABSOLUTELY NO SYSTEMIC EFFECTS!

Testimonial

"I am very pleased with the results of Renewed Nail[®]. Nothing worked on my most difficult patients, including oral medication, until Renewed Nail[®]."

Dr. Robert Khorrarniam, D.P.M.
Santa Monica, California

Nail polish may be applied over the dried Renewed Nail[®] protective base.

INGREDIENTS

Store upright between 2° and 30° C (36° and 86° F)

ACTIVE

Undecylenic Acid 1.0% - antifungal agent

INACTIVE

2-Ethyl Cyanoacrylate - seals nail to prevent absorption of air & water, starving the fungus

Hydroquinone - mild bleaching agent, improving nail appearance
